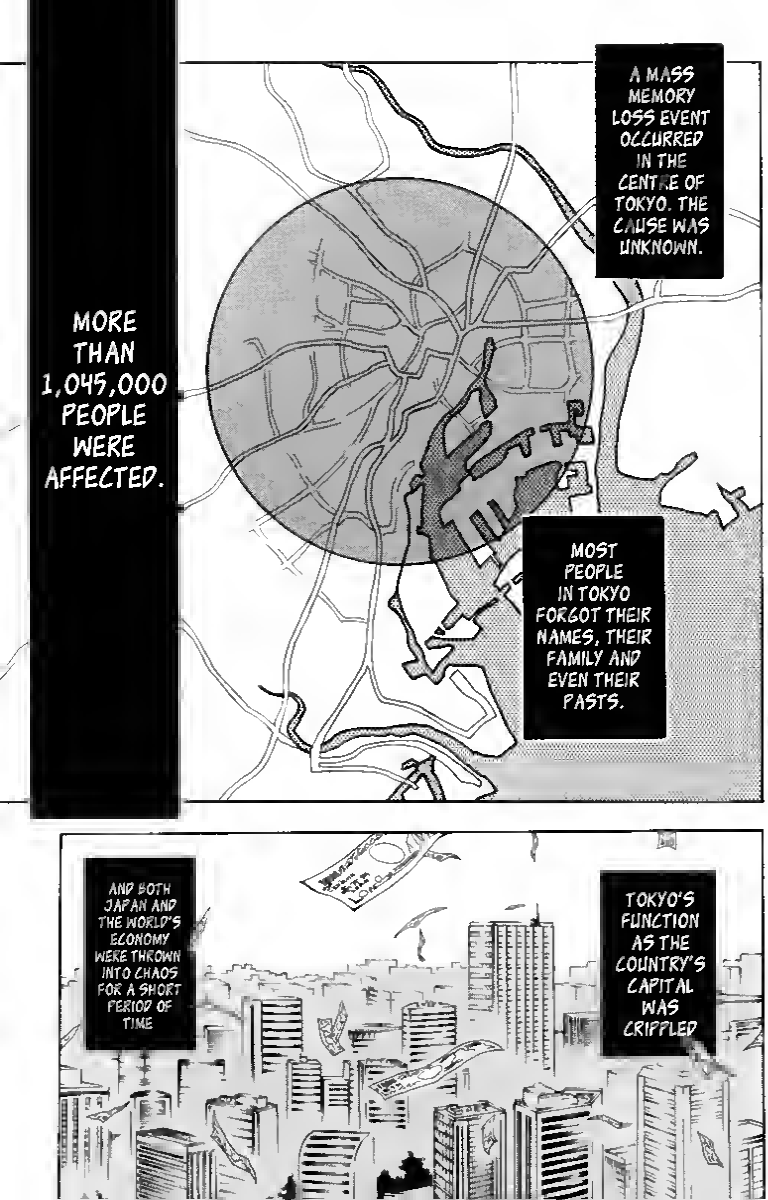
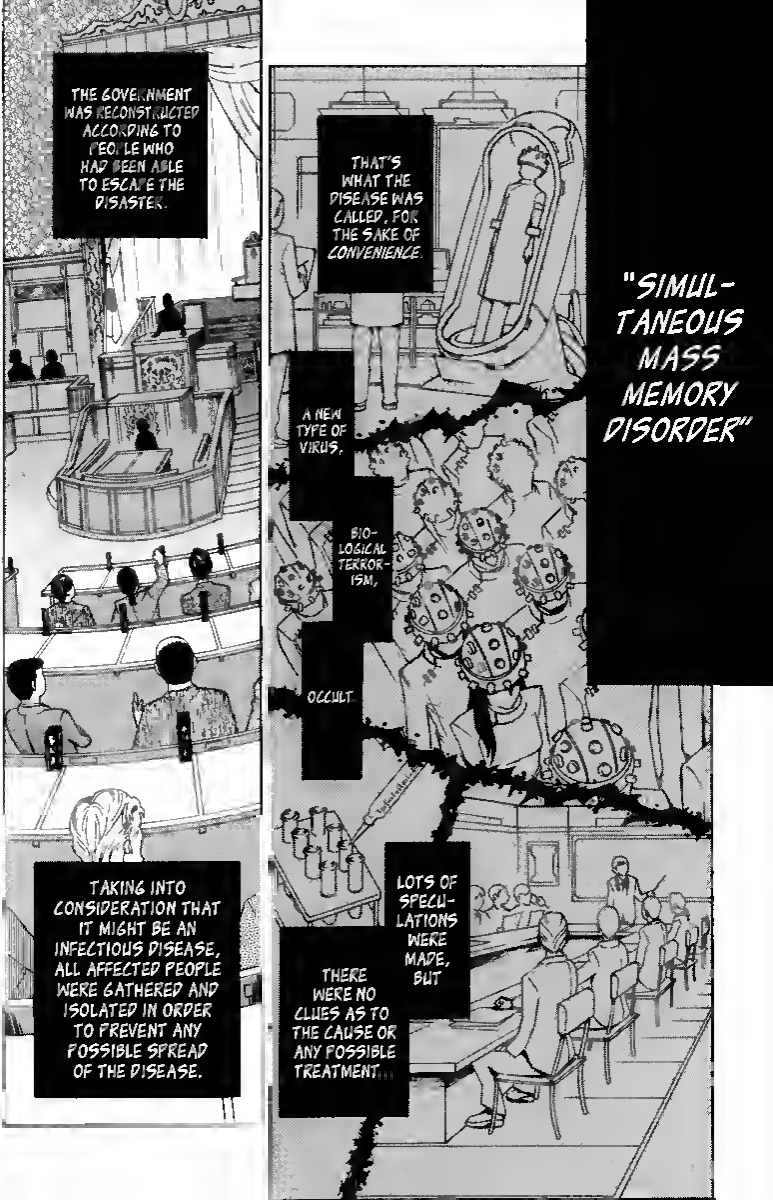
11TH JANUARY, 2038
Please follow us quickly



MORE THAN 1,045,000 PEOPLE WERE AFFECTED.
A MASS MEMORY LOSS EVENT OCCURRED IN THE CENTRE OF TOKYO. THE CAUSE WAS UNKNOWN.
MOST PEOPLE IN TOKYO FORGOT THEIR NAMES, THEIR FAMILY AND EVEN THEIR PASTS.
AND BOTH JAPAN AND THE WORLD'S ECONOMY WERE THROWN INTO CHAOS FOR A SHORT PERIOD OF TIME
TOKYO'S FUNCTION AS THE COUNTRY'S CAPITAL WAS CRIPPLED



THE GOVERNMENT WAS RECONSTRUCTED ACCORDING TO PEOPLE WHO HAD BEEN ABLE TO ESCAPE THE DISASTER.
TAKING INTO CONSIDERATION THAT IT MIGHT BE AN INFECTIOUS DISEASE, ALL AFFECTED PEOPLE WERE GATHERED AND ISOLATED IN ORDER TO PREVENT ANY POSSIBLE SPREAD OF THE DISEASE.
THAT'S WHAT THE DISEASE WAS CALLED, FOR THE SAKE OF CONVENIENCE.
A NEW TYPE OF VIRUS.
BIOLOGICAL TERRORISM.
OCCULT.
LOTS OF SPECULATIONS WERE MADE, BUT

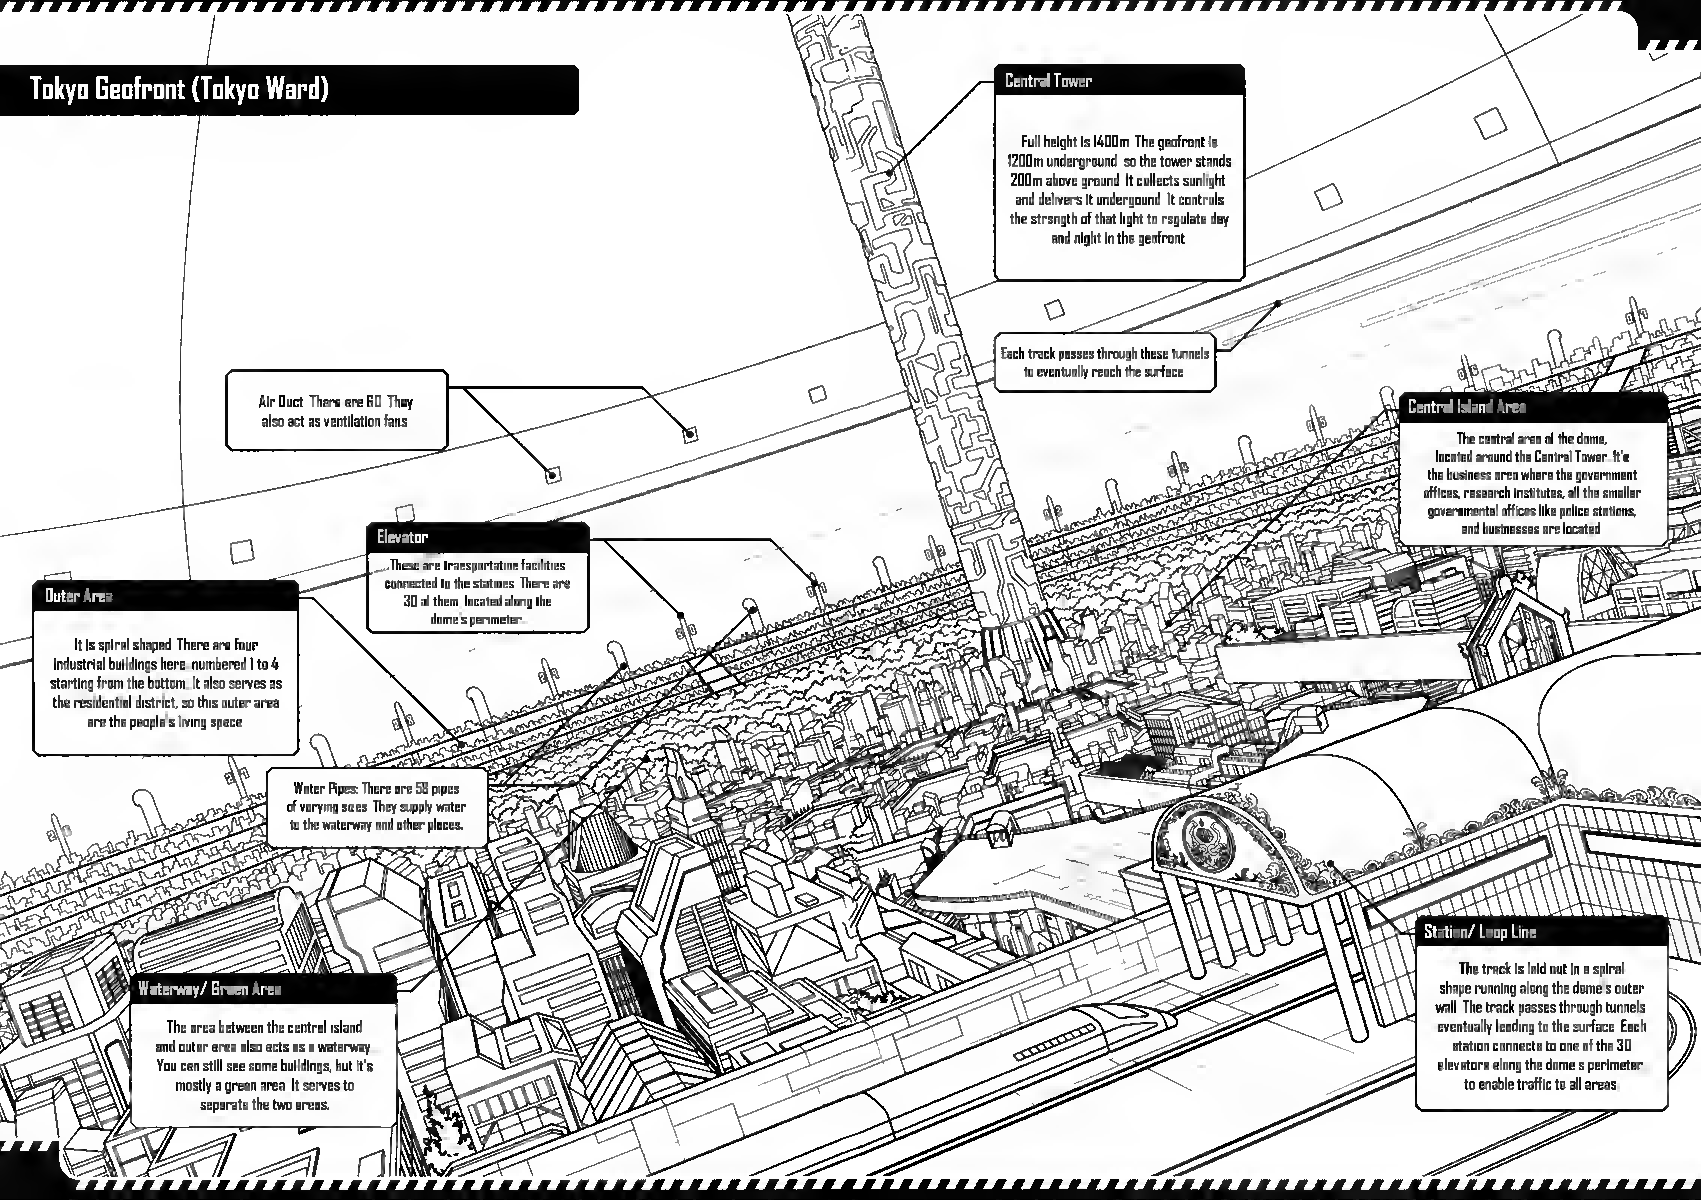
Chronology #1

Tokyo Geofront (Tokyo Ward)



Central Tower

Full height is 1400m. The geofront is 1200m underground, so the tower stands 200m above ground. It collects sunlight and delivers it underground. It controls the strength of that light to regulate day and night in the geofront.

Each track passes through these tunnels to eventually reach the surface.

Air Duct. There are 60. They also act as ventilation fans.

Central Island Area

The central area of the dome, located around the Central Tower. It's the business area where the government offices, research institutes, all the smaller governmental offices like police stations, and businesses are located.

Elevator

These are transportation facilities connected to the stations. There are 30 of them, located along the dome's perimeter.

Outer Area

It is spiral shaped. There are four industrial buildings here, numbered 1 to 4 starting from the bottom. It also serves as the residential district, so this outer area are the people's living space.

Water Pipes: There are 58 pipes of varying sizes. They supply water to the waterway and other places.

Waterway/ Green Area

The area between the central island and outer area also acts as a waterway. You can still see some buildings, but it's mostly a green area. It serves to separate the two areas.

Station/ Loop Line

The track is laid out in a spiral shape running along the dome's outer wall. The track passes through tunnels eventually leading to the surface. Each station connects to one of the 30 elevators along the dome's perimeter to enable traffic to all areas.
